Invited Sessions

Title	Invited Speaker	Organizer
Innovative clinical trial designs: estimands and operating characteristics	Frank Bretz (Novartis, Basel)	Silvia Calderazzo (DKFZ, Heidelberg)
Developing guidance for statistical analysis in observational research - a STRATOS Initiative update	Georg Heinze (Medical University of Vienna, Austria)	Matthias Schmid (University of Bonn), Carsten Schmidt (University Medicine Greifswald)
Biometric Research Outside High-Income Settings	Bernhard Kerschberger (Doctors without Borders, eSwatini)	Michael Schomaker (LMU München)
Statistical Issues in Animal Testing	Frank Konietschke (Charité, Berlin)	Bernd-Wolfgang Igl (Boehringer-Ingelheim) und Michael Lauseker (LMU München)
Stochastic processes in time-to-event analyses	Hein Putter (Leiden University Medical Center, The Netherlands)	Dennis Dobler (Vrije Universiteit Amsterdam, The Netherlands) and Jan Feifel (Merck Healthcare KGaA, Darmstadt)
Advanced statistical modelling for polygenic risk scores to enhance their transferability to underrepresented populations	Yosuke Tanigawa (MIT, Harvard, MA, USA)	Christian Staerk and Andreas Mayr (both University of Bonn)
Risk prediction meets causal inference	Nan van Geloven (Leiden University Medical Center, The Netherlands)	Vanessa Didelez (BIPS, Bremen)
Copula Regression for Time-to-Event Data	Ingrid van Keilegom (KU Leuven, Belgium)	Nadja Klein (TU Dortmund) and Andreas Mayr (University of Bonn)
Synthetic data with privacy guarantees: from applied statistics to generative machine learning	Marvin Wright (BIPS, Bremen)	Andreas Ziegler (Medicine Campos Davos, Switzerland)
