

Statistical Project Leader (Associate Director), Biostatistics

At Sanofi, we chase the miracles of science to improve people's lives. We believe our cutting-edge science and manufacturing, fueled by data and digital technologies, have the potential to transform the practice of medicine, turning the impossible into possible for millions of people.

As a Statistical Project Leader in Biostatistics, you **will lead one or more indications/projects** in a Therapeutic Area, under minimum supervision of senior statistical project leader or team leader. You will be supported by a Biostatistics group that fosters people development, offering compelling career opportunities that value diversity of thought and abilities, to optimize overall success and have a meaningful impact on patients' lives.

Main job responsibilities

Lead a project/one or several indications of a project in clinical development

With minimal direction from senior statistical project leader or team leader, provide statistical support and scientific leadership for responsible projects. Accountable for statistical aspects of clinical development plans, studies and submissions activities (when applicable), including quality, relevance to external stakeholders (e.g. regulatory authorities, medical journals), and scientific validity

Mentor people working on the project. Promote teamwork, quality, operational efficiency, and innovation. Create productive work environment. Ensure project team compliance with SOPs and departmental standards

Plan and track project activities, timelines, and resource use. Provide justification for planned resource needs. Seek to optimize resource utilization through efficient and well-managed resource allocation and across projects or areas. Capacity to respond to unscheduled increase in project workload

Ensure productive collaborations with other functions in the aligned project team and with other statistics project leaders and in communicating with senior leadership

Represent statistics in cross function working groups. Contribute to operation process optimization and provide inputs to statistics standards

Location: Amsterdam, Gent,
Frankfurt, Berlin

Job type: Permanent, Full time

50% Remote working

Job Id: R2736763

We chase the *miracles*
of science to improve
people's lives

About you

PhD/MS in statistics or related discipline with at least 6 years of pharmaceutical experience in clinical development, including late phase clinical development

Broad knowledge and good understanding of advanced statistical concepts and techniques; able to do advanced statistical analyses using SAS or R

Demonstrated strong project management, interpersonal and communication skills

Proficient in written and spoken English

Pursue progress, discover extraordinary

Better is out there. Better medications, better outcomes, better science. But progress doesn't happen without people – people from different backgrounds, in different locations, doing different roles, all united by one thing: a desire to make miracles happen. So, let's be those people.

At Sanofi, we provide equal opportunities to all regardless of race, colour, ancestry, religion, sex, national origin, sexual orientation, age, citizenship, marital status, disability, or gender identity.
