

## Biostatistician (f/m/d)

The Cardio-CARE research group at the Medizincampus Davos, Switzerland, is a program of the Kühne Foundation. We are searching for a highly motivated **Biostatistician (f/m/d)** with 80% to 100% working time to join our biostatistics team. You will contribute to ambitious, collaborative projects focused primarily on cardiovascular disease research.

The flagship project is a randomized controlled trial led by the University Medical Center in Hamburg, involving more than 3500 patients with a specific cardiovascular disease from over 12 countries.

### Your key responsibilities

- You drive the adoption of R into a regulated environment.
- You drive the establishment of standard operating procedures.
- You participate in study protocol writing.
- You participate in the publication of research findings.

### What you bring

- You are a proactive and independent thinker with a Ph.D. in Biostatistics, Statistics, Mathematics, or similar, with at least 3 years of experience in the pharmaceutical or medical device industry.
- You have experience in developing standard operating procedures.
- You have strong R programming skills, and you are proficient in using code repositories (GitHub).
- You have experience in applying system validation procedures and version control.
- You are familiar with working in a Linux/Unix environment, including shell scripting.
- You have a solid understanding of the statistical principles and methods used in clinical study reports.
- You have applied experience with SDTM or ADaM CDISC data.
- You have experience analyzing data from epidemiological studies or clinical trials.
- You have extensive experience supporting clinical study projects.
- You are enthusiastic and passionate about science.
- You love to communicate, collaborate, connect different scientific disciplines, and contribute to multidisciplinary teams.

### Why join us?

- Be part of a collaborative, international research environment.
- Work on innovative projects with real-world impact.
- Drive scientific infrastructure with meaningful responsibilities.
- Benefit from excellent opportunities for personal and professional growth.
- Support with relocation processes for you and your family.
- The workplace is Davos, which is more than just a mountain resort. It is a hub of science, sports, and international exchange.
- Competitive salary with the possibility to partially work from home.

### Ready to apply?

We look forward to your application! Please send

- A short motivation letter outlining why you are the ideal candidate
- Your detailed CV
- Contact details of 2–3 referees

to **[info@cardio-care.ch](mailto:info@cardio-care.ch)**

There is no fixed application deadline. Applications will be reviewed on a rolling basis until the position is filled.
